Introduction:

The Ministry has not been immune to the many challenges as a result of the rapid changes in demand surrounding the global world. However it had a huge role to play in ensuring Samoa's business environment is resilient and recovers from both the impacts of the global recession and the post tsunami recovery which had made substantial physical damage to Samoa's tourism sector. The Ministry therefore provided its full support in managing and channelling funds provided to the Government from development partners particularly under the Private Sector Support Facility (PSSF) but also under the Tourism Tsunami Rebuilding Programme (TTRP) grant.

The momentum for building and fostering partnership with the private sector has been accelerated with the new Minister on board by the end of the financial year. The Hon. Fonotoe N. P. Lauofo was keen in progressing and fast tracking Samoa's intent for WTO accession. Samoa's resilience was noted in the improvement of Samoa's business climate as reforms took place for its Legislations, regulations and policies that look at facilitating the business process and meet WTO requirements. This is reflected by the results of the World Bank report on Doing Business which saw Samoa improve its ranking from 2010 of 57 to 61 by 2011.

The major milestones to note for the Ministry in this financial year are as follows:

1. Review of legislations, regulations and policies with the aim of updating the legal framework for business environment and creating a more enabling environment for doing business,
2. Reviewing of the Ministry's corporate direction through documenting achievements and lessons for formulation of its direction for the next 2 years against Governments national plans,
3. Review of the Ministry's internal environment looking at new ways of delivering services, improving processes and putting in place systems that are aimed at facilitating a timelier response to the needs of clients and private sector.

SECTION 1: MINISTRY OF COMMERCE, INDUSTRY AND LABOUR**1.1 OUR VISION**

OUR VISION IS TO LEAD AND EXCEL IN THE PROVISION OF QUALITY SERVICE TO FOSTER ECONOMIC GROWTH FOR ALL.

1.2 OUR MISSION

To provide quality advisory service and develop pragmatic regulatory frameworks to facilitate the development of the private sector to stimulate investment, industry development, fair trade competition, create full employment of local workforce and highly qualified trades of people, generate more work opportunities, improve safe work environment, increase innovation and registry integrity in Samoa.

1.3 OBJECTIVES OF OUR MINISTRY:

The Ministry's objectives to support the implementation and achievement of its vision and mission are as follows:

- 1. Provide appropriate policy advice to the Minister of Commerce, Industry and Labour on all areas of the Ministry's mandate,**
- 2. Provision of an efficient and effective secretariat and administrative support to the Minister,**
- 3. Providing a high level of industry development and facilitating an Investment friendly environment,**
- 4. Setting standards for trade practices and for the production, distribution and trading of goods and services and enforcing compliance and protection of consumers from unfair trade practices,**
- 5. Encouraging highly skilled workforce of trades people and generation of more employment opportunities and full employment of local workforce,**
- 6. Enforcing labour and employment relations, foreign workers and ensuring safe work at the workplace,**
- 7. Full protection of rights of intellectual property creators and properties, Full compliance with registration obligations under the companies laws and other registries administered in the Ministry and Protection of efficiency and integrity of all registries and lastly,**
- 8. To ensure that sufficient resources (both financial and human) are available to support the effective delivery of the Ministry's services to achieve its Vision and Mission.**

1.4 OUR MANDATE :

Overall, The Ministry is mandated to administer regulatory frameworks that:

- 1. Promote Industry development, foreign investment and guarantees the rights of citizens to participate in the economy of Samoa,**

2. Sets standards to regulate fair competitive practices to promote a fair level playing field in all trade,
3. Administers the Apprenticeship Scheme, Employment Services and collection and dissemination of Labour Market information,
4. Promotes and enforces labour and employment relations, foreign worker employment and occupational safety and health,
5. Manages the registries of companies and other legal entities and enforces statutory obligations. Management of IP registers and protection of rights of IP holders.

The mandates of the Ministry are also affected by the following:

- ✓ Statement of Development Strategy 2008 – 2012
- ✓ Immigration Act 2004
- ✓ Ministerial and Departmental Arrangements Act 2003
- ✓ Public Finance Management Act 2000
- ✓ Public Bodies (Performance and Accountability) Act 2001
- ✓ Public Service Act 2004 and its amendments
- ✓ PSC Employment instructions.

The Ministry's mandate emanates from its 38 legislations and provides the key responsibilities in support of national developments objectives as highlighted in the Strategy for Development of Samoa. Despite having its legislative reform programme under the leadership of the Law Reform Commission on hold, the Ministry continued through other assistance, with the review of its various legislative mandates with the guidance of the Attorney Generals (AGs) Office including the following:

- i. Review of the Government Export Guarantee Scheme (on hold for several years) noting relevant provisions of the Public Finance Management Act for Cabinet approval,
- ii. Review of the Foreign Investment Bill to review the list of reserved activities,
- iii. Fair trading regulation through the approved Eggs Standards that became effective on 10th May 2010,
- iv. Review of the Samoa Metrology Act started in early 2011 with assistance from the Commonwealth Secretariat aimed at replacing the outdated Weights and Measures Ordinance 1962. Draft is currently with the AGs office for review,
- v. Review of the Labour and Employment Relations Bill (LER) to ensure compliance with ILO conventions,
- vi. Occupational Safety and Health in the workplace bill was also drafted,
- vii. Intellectual Property (IP) Legislative review was initiated with consultation with Stakeholders
- viii. Personal Property Securities Act (PPSA) consultations were initiated to improve private sector access to financing by unlocking movable assets to form part of their financing security.

These to name a few were some of the ongoing efforts by the Ministry in support of the Governments overall objective of creating an updated legal framework to support Private Sector Development that would improve the quality of life for all Samoans.

1.5 OUR VALUES AND PRINCIPLES:

Our values encompass those values of the public service which are crucial to the successful delivery of our services. We aspire to keep and respect their importance in the achievement of our Vision and Mission:

- Honesty – we value honesty in the way we perform our duties of service to the public,
- Impartiality – we value impartiality by treating our stakeholders equally and fairly maintaining political neutrality,

- Service and Commitment – we aspire to provide a service that is unconditional with a commitment to satisfy our client needs,
- Respect and empathy – we respect the thoughts, feelings and concerns of others and seek first to understand than to be understood,
- Transparency and Accountability – we encourage open communication and commit to ensure that our actions and decisions are consistent and made with clear reasons in an open manner,
- Efficiency and effectiveness – employment of resources to achieve results of value to the public in the most economical way.

1.6 OUR ORGANISATION STRUCTURE:

To be able to achieve its eight (8) key objectives highlighted above (1.3), the Ministry continued to ensure it had sufficient staff to support its growing mandate. By the end of the financial year, only four new positions were added. However of the total vacancies there was an overall reduction in the rate of vacancies from 21% (15 vacancies out of 70) to 14% (11 vacancies out of 74) as the Ministry's improved its recruitment and selection process to ensure it had sufficient staff to deliver on its annual results at the time it is needed. It is envisaged that more staff would be added to its structure for the Ministry's pipeline activities including the establishment of two staff positions for the Private Sector Support Facility Grant/Project (PSSF) as well as the Trade, Commerce and Manufacturing (TCMP) Sector plan. These will again have an impact on the Ministry's organisation structure and resources including administrative and financial such as office space, office equipment, IT resources etc. The Ministry is currently discussing with the Accident Compensation Corporation (ACC) additional office space for expansion of the office to Level 3 of ACC currently occupied by the Ministry of Agriculture which as they prepare to move to new office spaces proposed for the new Government premises being constructed at Sogi.

1.7 MCIL ORGANISATIONAL STRUCTURE 2010 – 2011

SECTION 2: OBJECTIVES AND PERFORMANCE MEASURE ACHIEVEMENTS

This section summarizes the main achievements within the reporting period as delivered by the various divisions of the Ministry.

2.1 OFFICE OF THE DEPUTY PRIME MINISTER & MINISTER FOR COMMERCE, INDUSTRY AND LABOUR

2.1.1 OBJECTIVE: Provision of an efficient and effective secretariat and administrative support to the Minister.

2.1.2 PERFORMANCE ACHIEVEMENTS:

The Ministry continued its ongoing services to support the administration of the Minister's office. The Hon. Misa Telefoni continued the first nine months of his final year in Government with the General Elections looming in March 2011. By the end of the General Elections, the Hon. Fonotoe N. Laufo succeeded him to lead the Ministry over the next five (5) years. Of significance at this time was the new leadership and the new Ministers determination to expedite Samoa's accession with the WTO as well as fostering a much closer working relationship with the private sector.

Support services provided by the Ministry included secretariat support in preparing relevant research and documents required for the Minister's meetings in Samoa (for Parliament, Cabinet, Private Sector, various Boards, overseas businesses/investors, and Government dignitaries) but also for official travels overseas where the Minister's presence is required. All preparations for the Minister's travel were well coordinated and prepared according to Cabinet approval and existing policies on travel arrangements. Meeting documents/advice was provided on time and in accordance with the Minister's wishes.

In this financial year, the Minister travelled to Fiji to participate in the Pacific forum Line shareholder/joint venture meeting and to the Trade Ministers meeting in Tonga. Communication continued with open dialogue with the Minister on the various legislations/mandates of the Ministry. A weekly meeting with the CEO was initiated to keep the Minister abreast of Ministry developments. This was coupled with the provision of briefing notes and reports were also prepared (with recommendations) to keep the Minister well informed of the Ministry's position in relation to its thirty eight (38) legislations.

2.2 OFFICE OF THE CHIEF EXECUTIVE OFFICER (CEO)

2.2.1 OBJECTIVE: Provide appropriate policy advice to the Minister of Commerce, Industry and Labour on all areas of the Ministry's mandate.

2.2.2 PERFORMANCE ACHIEVEMENTS:

With a new Chief Executive Officer on his second year with the Ministry, continuous dialogue and meeting took place with the Minister providing advisory support on the various mandates of the Ministry. This was particularly noticeable with the onset of the new Minister, where the CEO was quick to welcome the new Minister in provide briefing papers to keep the Minister abreast of the key priorities both at the national and international level to ensure a smooth transition of leadership.

One of the significant activities for the Ministry, as mentioned earlier was the implementation of the legislative review of the thirty eight (38) legislations of the Ministry under the leadership of the LRC- AGs office. Dialogue also continued at regional and international level with the CEOs active and continued participation /attendance in meetings such as Regional forum on IP for the policy makers of the LDC's of Asia and Pacific region, Starkist Meeting (to explore possible investment in Asau), All ACP Conference on Geographical Indications Pacific Tourism Investment Planning and Promotion Workshop, World Association of Investment Promotion Agencies Steering Committee meeting, Third Meeting of Pacific

Agreement on Closer Economic Relations (PACER) Plus Officials, Meeting with Exhibition & Travel Group in China.

Ongoing efforts were made to maintain an open and cooperative working relationship with the private sector through the management of the various Boards chaired by the Ministry including, the Industry and Development Board, Prices Control Board, Apprenticeship Council, National Codex Committee and the Samoa National Tripartite Forum. A committee was also set up for consultation and initiating of the Personal Property Securities Act (PPSA) aimed at improving private sector access to financing, thus increasing economic activity by unlocking the value of movable properties lying idle. This committee is also chaired by the CEO. The management and leadership of these committees were efficient and effective with the use of a transparent system in place for the overall management of the Ministry. **Bi annual status reports on Boards** were provided to Cabinet to keep them informed of developments within these Boards.

The Ministry, weekly management meetings continued to take place with its management team ensuring an open dialogue between the CEO and managers and allowed for not only sharing of knowledge/lessons learnt and best practices but also problem solving on the implementation of various activities. Key corporate achievements for the Ministry included the i) review of the Ministry's 2003-2007 Corporate plan, ii) formulation of the new Corporate plan 2010 – 2012, iii) the finalisation of outstanding annual reports for the periods 2007 – 2009 and iv) finalisation of the Ministry's Service Charter. As required the CEO also continued to provide 6 monthly Procurement report to PSC as well as Ministry of Finance on procurements carried out for the Ministry.

2.3 INDUSTRY DEVELOPMENT & INVESTMENT PROMOTION (IDIP) DIVISION:

2.3.1 OBJECTIVE: Providing a high level of industry development and facilitating an Investment friendly environment,

As highlighted in its Corporate Plan 2010-2012, the Industry Development & Investment Promotion Division (IDIP) outcomes are:

Outcomes:

1. Industry Development – High level of Industry development,
2. Investment Promotion – An investment friendly environment

2.3.2 PERFORMANCE ACHIEVEMENTS:

Enterprise Incentives Scheme (EIS) – Yazaki the remaining company under the Grandfathered clause of the EIS scheme. Yazaki's entitlements under the Grandfathered clause expired in July 2010. The company was proactive in seeking Cabinet's decision for continuous duty exemption of imported raw materials for its operation prior to the termination of the incentives, under the Duty Concession scheme as mandated under the Customs Amendment Act 2007. Yazaki remains being a major private sector employer and is the sole major exporter of wire harness to Australia.

Duty Suspension Scheme (DSS) – Site visits and facilitation of entries continued for the three remaining companies under the scheme (Nonu Samoa, R & L Keil Holdings & CCK Trading). The scheme provides duty exemption on the importation of raw materials for these businesses offering job opportunities as well as foreign exchange earnings through exports.

Duty Concession Scheme (DCS) – this scheme is mandated under the Customs Amendment Act 2007, a total of 19 applications were received by the Division of which 11 were issued approval, 7 pending additional information and 1 declined. The division conducted site visits and inspections of approved projects as well as facilitating approval of 125 entries for 9 qualifying projects.

Government Export Guarantee Scheme (GEGS) – The GEGs Committee and Sub committee met in February to discuss and decide the way forward for the scheme. A guideline was drafted with assistance from the Attorney General’s office to ensure relevant provisions under the Public Finance Management Act 2001 are captured. These will be provided for comments and endorsement of the Cabinet before roll out to the business community.

Private Sector Support Facility (PSSF) – A total of 79 applications were received and assessed during the financial year an increase of 39% compared to 2009 – 2010. The Technology, Agriculture and Tourism sectors had the most application submitted under the scheme. This is due to the number of marketing programmes the technology and tourism sectors were involved in promoting their business activities, such as the development of websites, overseas participation to trade fairs and exploratory visits. There was also demand for water tanks and tools from the agriculture sector; fortunately the scheme considers the granting to water tanks to projects only in areas where water is a constraint to farming activities. Promotions of the funding facility are ongoing through the local newspapers and website. An in country presentation was also carried out in collaboration with the SBEC programme in the launch of their sector profiles. The Steering Group also carry out their monitoring and evaluation role through site visits to those sites which have been awarded funds under the facility. As a result of the recommendations from KVA, the Ministry has established 2 project positions to assist the division in managing the secretariat due to competing demands from Ministry activities, as well as a proposal for the procurement of a vehicle to assist the Secretariat with its administration of the Facility.

As part of Governments support to the Private Sector, the budget allocations were also provided under the Ministry’s budget for private sector organisations in the form of grants under Third party outputs for Women in business and other Private sector organisations. An allocation is also provided for support to the Development of business under the Small Business Enterprise Centre. The Ministry also participated at the SBEC open day as part of its partnership arrangements to provide awareness to the business community on business related issues. Government also provides cost sharing funding support under the pooled funding budget support programme provided under the PSSF project for the private sector.

Under the Tourism Tsunami Rebuilding program (TTRP) which was housed under the administrative arrangement of the PSSF project, 24 applications were approved and submitted to Cabinet for endorsement.

Investment Environment – The number of Foreign Investment Certificates applications increased by 5 applications i.e. 66 new applications compared to 61 of the previous years with 98% approval rate recorded in the period under report. The areas which were notably high include retailing as well as the professional service areas. The Division continued to carry out inspection/site visits to ensure compliance of those being issues FICs both in Upolu and Savaii. The FIC bill review (both the Act and regulations) with the assistance of the AGs office is also ongoing for tabling in Parliament before the end of the financial year period. A foreign investment database is also kept by the Ministry to keep important records regarding the developments brought about through Foreign Investment activities.

The Division has also undergone a revamp of its investment theme preparing reviews of its investment tools such as advertisement with Business Advantage (a regional business magazine with a reputable circulation), investment guide, promotional brochures, National Investment Policy Statement (NIPS), investment DVDs on website. The division also carried out a review of the Setting up a Business procedure to improve its “Doing Business” ranking with the WB which in this financial year was at 55.

As part of promoting Samoa as a destination for investment in the film sector, support was also provided by the Government through the Ministry for funding of the *O le Tulafale* (The Orator) production through an unforeseen budget approval by Cabinet in the last quarter of 2010.

The Ministry facilitated two Investment missions as follows:

1. **StarKist:** A special committee consisting of relevant Government Ministries was set up to facilitate the request and mission of the Star Kist Company. The fact finding mission was to discover a possible location for relocating the American Samoa cannery. The executives of the company met with the Committee in July 2010 and exchanged information on the infrastructure/utilities and the business environment in Samoa. Three members (MCIL/EPC and SWA) represented the Committee and travel to American Samoa by invitation of Star Kist to sight the company and infrastructure required for installation when the company relocates. A memorandum of understanding was drafted for both parties to sign to further exchange information on the relocation of the company, but the company has not responded hence Cabinet has closed the case.
2. **Samoa China Ocean Investment Ltd.:** this was a fact finding mission on the procedures and processes of setting up business in Samoa.

Trade Commerce & Industry Development Board (TCIDB) – The Division continues to provide Secretarial support the development of trade, commerce and Industry through its Board (TCIDB). A total of 5 meetings were conducted in the reporting period. Some of the issues that were tabled and discussed at the development board meetings included most importantly the following:

1. **Issue between the British American Tobacco Limited and the Ministry of Health new Tobacco Law:** The Company made a presentation on the high cost of meeting the requirements by MoH under the new Act such as implementing of the inset outlining the danger of smoking, the prohibition of promotional campaign as well as defining public smoking which the new law bans. A subcommittee was established to look at the issue and the matter was left with the Attorney General's office and the Ministry to handle.
2. **Commercial Bank lending rates:** the private sector noted the drop in fixed deposit rates compared to the slow drop of the lending rates by the commercial banks. A subcommittee was set up to investigate the matter. A report of the subcommittee was tabled and was submitted to Cabinet for their consideration. The matter was referred back to Central Bank to work it out with the commercial banks.
3. **Other issues included were updates for the information of Board members covering:**
 - i. Star Kist fact finding mission on the relocation of the American Samoa cannery;
 - ii. WTO accession status and LCD graduation update;
 - iii. Decent Work Country Programme – Labour Law Reform
 - iv. Re-registration under the Companies Act 2001
 - v. Yazaki operations and the impact of the financial crisis
 - vi. Progress of Tourism Tsunami Rebuilding Programme etc.

2.4 FAIR TRADING AND CODEX ALIMENTARIUS (FTCA) DIVISION:

2.4.1 OBJECTIVE: Setting standards for trade practices and for the production, distribution and trading of goods and services and enforcing compliance and protection of consumers from unfair trade practices

As highlighted in its Corporate Plan 2010-2012, the outcomes of the Fair Trading and Codex Alimentarius (FTCA) Division are:

Outcome:

3. Level playing field for Traders and Consumers

2.4.2 PERFORMANCE ACHIEVEMENTS:

In the period under review, the Division continued its promotion of consumer and trader awareness of their respective rights and obligations in the marketplace to enhance the welfare of all Samoans through the promotion of competition, fair trade, and consumer protection.

Administration of the Codex Alimentarius

The Samoa National Codex Committee was set up by Cabinet to develop food safety standards. The first food safety standard achieved is the Fair Trading (Approved Eggs Standards) Regulations which came into force on the 10th May 2010, the day the Deputy Prime Minister and Minister of MCIL, Hon. Misa Telefoni endorsed it. However, enforcement of the Approved Eggs Standards was 12 months later, 10th May 2011. The objective of this Standards Regulations is to ensure product safety and quality standards of eggs for human consumption. Its scope apply to egg handlers, from primary production, sorting, grading, storing, transporting, packaging, distributing, and supplying of eggs by domesticated chicken intended for human consumption. Trade issues that arise during this month of enforcement relate to the labeling of the egg cartons for consumer information. The egg importers could not comply with the full labeling of the egg cartons to be in accordance with the information and labeling sections of the Standards Regulations. Importers had stick on labels for sell by dates which were easily removed from the cartons and replaced by another stick on label. The Standards Regulations stipulates that the labeling of sell by dates be stamped, stenciled, printed or branded marked onto the cartons. The other issue relate to the shelf life of the eggs which will either have 30 days from laying at or under 7°C, or five days from laying at ambient temperature.

The Ministry continued its participation in international fora on Food Safety Standards to bring to the fore a national issues in the executive body for the Codes Commission. At the same time keeping Samoa abreast of the rapid development of standards affecting our trading environment. Television advertisements were aired for 2 months to publicise awareness on requirements for the egg standard. A national meeting was also held with stakeholders before the launch of the egg standards to clarify some issues on the implementation of the Egg standard. Apart from the egg standards, the food labeling standard was also of priority and a draft is now ready for submission to the Samoa National Codex Committee (SNCC).

Fair Trading and Consumer Protection

The division continued to enforce and ensure the compliance of fair trading and consumer protection legislation through monthly price adjustments for all petrol facilities in Upolu and Savaii, as well as ongoing visits to Savaii covering all traders on prices, product standards, and calibration of weighting standards as well as the distribution of four (4) General Price Orders to all retailers in the country. Twelve (12) petrol adjustments were carried out, two (2) calibrations, one conducted for existing petrol pumps and another for four (4) new petrol pumps, two (2) general inspections of retail outlets in Savaii and ongoing weekly inspections in Upolu covering 95% of traders including newly established traders. It has been recorded a high rate (80%) of compliance in terms of pricing.

After the implementation of the right hand drive switch in Sept 2009, the Ministry noticed an increase in the number of complaints towards the second hand car dealers and responded by hosting a one day Ministry of Commerce, Industry and Labour

workshop for car dealers. An awareness advertisement was also launched on TV highlighting important facts that consumers need to look out for when buying any vehicle.

In August 2010, two officers from the division participated in a long outstanding (through funding from a Capacity Development Trust fund from Ministry of Finance) training attachment in New Zealand on calibration of weights to ensure the integrity of calibrating equipment being used to measure weight and measuring standards in Samoa. The Samoa Metrology Act was also reviewed in 2011 through a short term consultancy assistance funded by the Commonwealth Secretariat. This is aimed to replace the very outdated Weights and Measures Ordinance of 1962. The Draft is currently with the AGs office for review.

Prices Board

The Board continued to perform its function to ensure that prices of necessary food items are made available at affordable costs for everyone. Meetings of the Board held quarterly. All items continued to follow the fixed cost arrangement while flour, sugar, potatoes, onions and chicken leg quarters were subject to a percentage markup arrangement. Submissions were also reviewed for price increases for local products namely Cigarettes and LPG (BOC). Product composition in the General Price Order increased in every review. A total of 154 products have been recorded since the end of this financial period. In every review, some products faced increase in prices while some reduced. Some products remain unchanged due to lack of information received for the review of their prices, hence retained in the Order in case they would be imported again in the future and some of them were still found on shelves.

In November 2010, a Special Price Order was issued due to the sudden increase in landed costs of some products namely chicken leg quarters and sugar. These products have been removed from the fixed cost arrangement under Schedule 1 of the General Price Order and categorized under Schedule 3 delineating goods under percentage markup control.

Applications for price increase were approved for locally produced products such as Pall Mall 10s & 20s and LPG. Four (4) General Price Orders were distributed to all retailers round the country (Upolu, Savaii & Manono). The number of traders in Samoa according to distribution records continued to increase from 760 in the first six months to 817 at the end of this financial period. Ensuring effective compliance and freedom of consumers to exercise their rights in the marketplace has been governed by ongoing weekly inspections.

To facilitate Fair Trading and Consumer Protection, four (4) meetings were held by the Board to review prices of Goods under price control. Approvals by the Board in the form of Price Orders were widely distributed by the Division using the media such as television, radio and newspapers as well as wide distribution to all stores around Upolu, Manono and Savaii. Usually, distributions were carried out before the effective date.

World Consumer Rights Day

As required by a Cabinet Directive, celebrations were carried out for the annual commemoration of World Consumer Rights Day on every 15th day of March. This year's focus was commemorated as the promotion on consumer rights specified in the Fair Trading (Approved Egg Standards) Regulations 2010 to be enforced on the 10th May 2011. We publicized this special day using an advertisement on television for a number of days.

Daylight Savings Act: an initiative from the Electric Power Corporation and implemented under the Ministry's Weights and Measures legislation. Substantive resources were spent and work carried out to repair the town clock a significant monumental site in Samoa as the highlight of the Daylight savings programme. A consultant was hired from Australia specializing in repairing old town clocks to ensure the clock was up and running for the Daylight exercise. An unforeseen budget approval was provided by Cabinet for the preparations of the town clock (hiring consultant to repair) for the daylight saving activity.

Trade Sector Plan: In October 2010, initial discussions were convened with various Ministries on the initiation of a Trade Sector Plan to be chaired by the Ministry.

Competition policy: Proposals for funding technical assistance were submitted to the PIFS and the Commonwealth Secretariat for reviewing the legislations and drafting of an update competition policy framework considering Samoa's entry into WTO later in the year.

2.5 APPRENTICESHIP, EMPLOYMENT AND LABOUR MARKET DIVISION

2.5.1 OBJECTIVE: Encouraging highly skilled local workforce and their full employment

As highlighted in its Corporate Plan 2010-2012, the outcomes of the Apprenticeship, Employment and Labour Market division are:

Outcomes:

4. Full Employment of workforce,
5. Highly skilled workforce,

2.5.2 PERFORMANCE ACHIEVEMENTS:

Administration and coordination of Apprenticeship Council Meetings: Three (3) meetings of the Apprentice Council were held over the financial year. With the implementation of the MOU (Apprentice Council and NUS (training provider)) signed in February 2010, the council received 56 new applications for the programme. There were consultations by the Council together with stakeholders to discuss the upcoming review of the Apprenticeship Act & Regulations as well as the upgrading of the scheme through reviewing of National Competency Standards (NCS) formerly known as Industry Training Standards. These consultations included the Engineering Association, Plumbing, Carpentry, Refrigeration etc, lecturers from NUS, instructors from different vocational institutes like Don Bosco, Punaoa and local tradesmen from 7 current apprenticeable trades in the scheme. These are expected to be implemented in March 2012.

Administration and coordination of Trades Testing: The Trade tests were widely advertised in the media through TV1, TV3 and the Samoa Observer. Trade panel meetings were made for Welding with a practical test held on 25th and 26th March. On 29 July, the Apprenticeship Graduation was held with 44 graduands earning certificates. Significantly, the number of graduates is increasing gradually. The previous year's indicated the low no. of candidates/graduates in trade testing due to the suspension of the two schemes in 2008/2009 up to 2010, this being the preparation and signing of the MOA between MCIL and NUS. However, the numbers in both schemes has increased to date.

Awareness on Administration of Apprenticeship Scheme: The division participated on several awareness programs conducted by other bodies as mentioned above including Talavou programs. Other awareness programs were conducted in Savaii together with the Employment and Labour Market Division, for senior classes (Y12/Y13) in colleges.

Review and Update of Employment and Labour Market information: Data from numerous sources was used to update the database with the number of registered employers up to 1,100. This total number shows an increase if compared to the same period of last year, an indication of the growth in the number of businesses established and in operational from time to time. A total of 361 employment returns were collected from employers in the private sector as a requirement of the labour and employment Act and Regulation 1972 for the purpose of collecting information on employment of the formal sector employers. The employment update report was available to users whenever needed.

Training and Awareness: The training of jobseekers was carried out to keep those looking or in search of job offers and job opportunities, with the main aim and objective, to be well equipped and enhance knowledge, know the important values and related criteria, the appropriate skills required and the job finding methods when applying or entering into the workforce. Participants were awarded with certificates at end of training and records from participants attended previous training showed that some

have found employment and are currently in the workforce. The division as part of awareness participated in the NUS open day for senior schools and colleges set up a booth to showcase all the relevant materials such as posters, pamphlets and brochures on different available job guides and vacancy information. This aimed at encouraging school children to choose, decide and be sure of their right choice of career to pursue while in final years of schooling.

Facilitation of Employment Service: 124 job seekers were registered during the financial year and 126 were referred to employers for interviews. Only 30% of those job seekers referred were placed successfully and due to the fact that the placement part of the service is totally up to the discretion of the employer's decision and selection.

Review Minimum Wage: The recommendation for the minimum wage review submitted by the Samoa National Tripartite Forum is with the cabinet and ministry is awaiting approval on this issue.

Conduct Labour Market Survey of Private sector employers: an exhaustive task that was carried out toward the end of 2010, surveying employers both in Savaii and Upolu. The response rate was 63% target group despite the Ministry's efforts to collect data from all private sector employers. Information collected is being compiled, tabulated and analysed to provide a report for policy decisions. Report should be out before end of 2011.

2.6 INDUSTRIAL RELATIONS, WORK PERMITS AND OCCUPATIONAL SAFETY AND HEALTH DIVISION (IRWPOSH):

2.6.1 OBJECTIVE: Enforcing labour and employment relations, foreign workers and safe work at the workplace.

Outcomes:

6. Strengthen national labour and employment relations (LER) systems,
7. Improve Labour and Employment relations inspection and compliance with the LER Bill and Regulations,
8. Promote LER activities by employers and workers organisation,
9. Develop and enhance processes and systems on the approval of work passes for foreign workers
10. Strengthen national occupational safety and health systems,
11. Implement special programs for hazardous occupations,
12. Extend OSH protection to small to medium enterprises and rural and informal economy workplaces,
13. Promote collaborative actions against hazardous child labour and HIV/AIDs for stronger compliance,
14. Improve safety and health inspection and compliance with the OSH law and
15. Promote OSH activities by employers and workers organisation.

2.6.2 PERFORMANCE ACHIEVEMENTS:

Strengthening national labour and employment relations systems: Since Samoa became a member state of the International Labour Organization in 2005, its obligations to the ILO have resulted in the requirement for a review of its laws to ensure compliance with various ILO Conventions relating to the protection of workers as well as to ensure that the law is relevant and up to date with current practise.

There were several requirements and 8 core conventions ratified and were included under the Labour and Employment Relations (LER) Bill 2011 to ensure compliance of local processes and systems with ILO conventions.

One of the requirements as mandated that required all members of the ILO shall form a Tripartite Committee to include all of its constituents as in the Convention 144 (Tripartite Consultation Convention). The purpose of the SNTF is to ensure the social partners (government, Employers and workers) based on mutual trust and cooperation, consult with each other on labour policies and other relevant issues, thereby promoting industrial peace and contributing to a balanced growth of the national economy. A first meeting of the Samoa National Tripartite Forum was held in March 2010 to familiarise the members and to discuss the issues on the Labour Law Review. Other meetings conducted on the update of the Labour Law Review as well as the review of the minimum wage.

Improve labour employment relations inspection and compliance with the LER Bill and regulations:

There were 138 inspections that were conducted for the reporting period. The purpose was to conduct a record keeping audit with employers on terms and conditions of employment whether they are comply with the provisions of the Labour and Employment Act 1972. The findings reflects that most of employers maintain a good record keeping and are fully aware of their obligations under the Labour and Employment Act 1972, whereas others find it very useful as a reminder of what records they need to maintain as well as clarifying some of the provisions of the Labour Act. I.e. calculations of overtime, public holidays, authorise deductions and understanding of what entitlements should be paid out at the time of resignation.

A new database was developed to capture information received from MfR on business licence and NPF, with classifications by industry sector etc. The purpose of this database is to enable inspectors to identify the Zones or location, types of industry, entity and kind of business operated there for easy referencing during inspections not only for industrial relation but also work permit and to identify which industry sector employed more workers.

81 investigations were carried out under the old legislation but new procedures will be drafted in line with the proposed Bill and will be effective ones approved by Parliament.

Promote LER activities by Employers and Workers Organisations: two social dialogues were carried out in October 2010.

Develop and Enhance processes and systems on the Approvals of work passes for foreign workers: 179 work permits were received and assessed with 156 being approved and the rest rejected. Rejections were mainly due to requirements not being met for merit of employment. New provisions were also included in the LER Bill 2011 for Freedom of Association, rights to organise and collective bargaining for foreign workers.

Strengthen national occupational Safety and health systems: OSH bill has been drafted and should be with Parliament by December. Ongoing trainings were carried out for new officers/inspectors to enhance their level of understanding of the legislations and reporting requirements. A total of 50 work accidents were reported and investigated. Most of the accidents reported were from the construction industries with a total of 20 cases and the rest were from manufacturing 15, electricity & water 7, merchandise & hospitality 5, transport 3. From the investigations of these cases, they were mainly caused through the failure of the workers to use the protective gears provided. Lack of proper supervision also contributed to the causes of the accident, in which the employers concerned were strongly advised.

Improve safety and health inspection and compliance with OSH Law: provisions have also been included in the legislation to strengthen the powers of the inspectors in the enforcement of the laws. A

total of 200 inspections were conducted to ensure safety and health in the workplace. The level of compliance by the employers covered with regards to their legal obligations was discovered satisfactory. However, there is a need for both the employers and workers to partake in trainings and awareness programmes to ensure full understandings on the requirements of the laws.

Implement special programs for hazardous occupations: constructions sites are inspected to ensure compliance with legislations and also to develop a Code of practice for these industries. Those industries which pose the highest risks to work safety and health will be prioritised.

Extend OSH protection to small to medium enterprises and rural and informal economy workplaces: Training programmes have been developed and expected to be implemented in the next financial year.

Promote collaborative actions with hazardous child labour and HIV/AIDs for stronger compliance: provisions have been included in the draft legislation to ensure ILO conventions on child labour, HIV/AIDs are included. This will be monitored/managed under the auspices of the National Tripartite OSH Committee, which is also proposed under the legislation.

Promote OSH activities by Employers and workers organisations:

2.7 REGISTRIES OF COMPANIES AND INTELLECTUAL PROPERTIES (RCIP) DIVISION:

2.7.1 OBJECTIVE: Full protection of rights of intellectual property creators and properties, full compliance with registration obligations under the companies' laws and other registries administered in the Ministry and Protection of efficiency and integrity of all registries.

Outcomes:

16. Full protection of rights of intellectual property creators and proprietors,
17. Full compliance with registration obligations under companies laws and other registries administered in the Ministry and
18. Protection of efficiency and integrity of all registries

2.7.2 PERFORMANCE ACHIEVEMENTS:

Registration of Companies, Incorporated Societies, Cooperatives, Charitable Trusts and Credit Unions: A notable increase in the number of registrations with 297 companies, 12 incorporated societies and 15 charitable trusts.

Registration of trademarks, patents and industrial designs: During the period reported on there was a significant increase in the number of filings of trademarks, patents and industrial designs compared to the 2009/2010. The increase in the number of filings is a positive indicator as it implies that there is a great improvement in the management of IP by the Samoa Intellectual Property Office.

Computerisation of trademarks: 216 trademarks have been entered during the period of the report. These are mainly new filings, and registration done during that period. The number of trademarks entered into the system is a continuation of the work from previous years.

The project for the electronic registry of trademarks completed the first phase and negotiation for the completion of this project is continued.

Computerisation of companies Registry: 220 companies back captured.

Maintain and update the Register of Companies, Incorporated Societies, Cooperatives and Credit Unions (CU): 942 companies were inspected, 210 incorporated societies inspected, 391 annual returns filed, 29 financial statements filed, and 4 incorporated societies de-registered. Ongoing inspections were carried out both Upolu and Savaii result with the compliance of these legal entities to the requirements of the legislations.

Maintain and update the Register of Trade Marks, Patents, Industrial designs and copyright: 133 trademarks renewals and 28 inspections carried out to remind video shops of their obligations under the Copyright Act

Carry out training and awareness programmes: The trainings on the e-registry trademarks had been mainly on training the staff allocated to work on phase 1 of the project on the back-capture of existing files and new applications on how to input these into the system. The WIPO experts will undertake trainings for users and staff of RCIP/Ministry of Commerce Industry and Labour will start prior to the end of phase three and before the implementation of the system.

In addition to the financing of technical experts the WIPO had also offered assistance through the provision of four computers, printer, scanner and a server to be used for the project.

Prepare programmes for the celebration of the World Intellectual Property Day: The RCIP had been carrying out various activities to celebrate the World Intellectual Property Day which is on the 26 April of every year. During the period of the report there were three trainings carried out on Copyright including a National Seminar on Copyright conducted by the WIPO. The national trainings that were conducted by the staff of the Ministry were carried out in both Upolu and Savaii for secondary school students.

During the trainings it was evident that most of the participants had limited knowledge on the subject matter however they requested further training and awareness programmes. Given the limited financial resources only a certain number of training programmes could be undertaken

Establishment of a licensing and membership mechanism to facilitate the enforcement of rights of copyrights holders: During the period of the report the RCIP took a proactive stance in the creation of a data base of Copyrighted works. That work was seen to be a crucial initial step towards the establishment of a Collective Administrative system of Rights for Copyrighted works.

The works were collected from different authors who had approached the office to seek our advice on copyright issues that are pertinent to their works. At the start the main works that were recorded were mainly musical works and some short stories from locally based authors.

The major difficulties encountered with the establishment of the database are the collection of different works and identification of the true authors of such works.

2.8 CORPORATE SERVICES UNIT (CSU):

2.8.1 OBJECTIVES: To ensure that sufficient resources (both financial and human) are available to support the effective delivery of the Ministry's services to achieve its Vision and Mission.

Outcome:

19. Sufficient resources are available to support the Ministry in achieving its vision and mission.

2.8.2 PERFORMANCE ACHIEVEMENTS:

The Corporate services unit continued to play a pivotal role in harnessing support for the delivery of the Ministry's resources. An ongoing constraint perhaps experienced across Government is the lack of capital resources required to support the work of the Ministry. Vehicle issues continued to be a problem with a Ministry of Commerce, Industry and Labour

fleet of 8 vehicles (three at the time requiring serious attention or complete write off). The Ministry managed to implement its activities for its six outputs with the use of five vehicles; two dedicated servicing the needs of the Minister's office. The Ministry made efforts to explore all options available to procure a vehicle even to the extent of seeking Cabinet approval, particularly during the RHD switch, however it was unsuccessful.

These were some of the key highlights for the corporate services division:

- Coordinate the consultations (internal as well as with Stakeholders) drafting of the review of the 2003-2007 Corporate Plan and formulation of the 2010/2012 Corporate Plan. The Ministry incorporated all comments provided by participants from various Government, non government and private sector actors in its final corporate plan,
- Prepared and finalised including submission to Parliament of the 2007 – 2009 Annual reports. After its submission to Parliament, the 2009-2010 annual report was also prepared, despite difficulty with staff turnover and loss of institutional knowledge in terms of achievements,

Both the Corporate planning and Annual reporting activities were significant in bringing together the Ministry in formulating its vision based on lessons learnt from experiences/barriers encountered, and celebrate achievements documented. It fostered even more collaborative planning, inspiring the six divisions to draw up a combined vision for the Ministry over the next 2 year.

- Capability task team set up to start work on the formulation of the Ministry's first Capability plan to be aligned with its objectives in its Corporate Plan needs,
- Reviewed the Service Charter with a careful look at areas where gaps needed to be addressed for publication by earlier half of the 2011-2012 financial year,
- Carried out a Training needs survey within the Ministry to gauge training needs of staff,
- Carried out a Staff Satisfaction survey as a means of engaging with staff on how they felt about their work and management of the Ministry,
- Initiated Knowledge sharing exercise held on quarterly basis to allow those who attended overseas meetings/trainings/workshops to share knowledge on what they had learnt from their travels,
- Carried out procurement training refreshers for those involved in procurement not only in finance but also in other divisions,
- Carried out refreshers for staff on the Public Service working conditions and entitlements (PSC-WCE),
- Prepared a briefing document/welcome package to replace formal orientation in the public service for Ministry new recruits,
- Facilitated and initiated the roll out of the Performance Appraisal system rolled out by the Public Service to improve performance of staff,
- Carried out for the first time in country training in September on: i) "effective leaders and empowering people and ii) effective time management" for management level staff,
- Significant procurements – procured three new vehicles for the Ministry after writing off 3 old vehicles for the Private sector support facility, Chief executive officer and a van for the Ministry,
- Formulation of the IT Policy was initiated,
- Finalise legal arrangements for the Ministry's lease with the ACC,

- Establishment of a Principal IT officer to help reduce costs of repairs and maintenance and to ensure the Ministry received the IT support it needed when it was needed. A Legal Officer was also requested and the Ministry will continue to pursue and negotiate this with the PSC,

SECTION 3: HUMAN RESOURCE & STAFF PROFESSIONAL DEVELOPMENT

With high turnover, it is difficult to retain knowledge and it takes time for new and fairly young staff to catch up. However, as usual, the Ministry is fortunate to enjoy the numerous training opportunities for its staff to get hands on exposure both at the national and international level. These help with the **professional development of staff** in enhancing their capacity in the various focal areas of the Ministry. Two trainings were secured and carried out under funding from the NUS – IOT Oloamanu In country training programme targeted for higher level managers aimed at refreshing/sharpening their time management, leadership, coaching and supervisory skills. This was the first time the Ministry explored and benefitted from this NZAP funded trainings under implemented via the Oloamanu training center at NUS. Annex 1: outlines overseas trainings/meetings and workshops where Ministry staff participated in the financial year.

A task team was set up to start the formulation of the **Ministry's Capability plan**, a tool to support its Corporate Plan objectives. It is envisaged that this plan would be finalised by early on in the next financial year. The Capability plan will examine closely and integrate the performance appraisals systems rolled out by the Public Service Commission in the period.

Mechanisms are in place to ensure that **staff knowledge is increased and shared within the Ministry**. It is important that this continue with its ongoing awareness activities within the Ministry to ensure staff quickly find their footing and get a full grasp of the Ministry's direction early on in their employment. This is basically through the important use of existing IT resources available to capture/share information for ease of access and efficiency and effectiveness of knowledge and quality response to stakeholders. It is hoped that the use of IT tools to store and share information will facilitate in this process to bridge the gaps and allow the Ministry to provide rapid response to queries from the private sector.

Internal policies were also developed on various human resource matters to ensure transparency of the application of some of the key policies affecting employment of staff as prescribed by the Public Service Commission. These internal policies include:

1. Attendance and leave policy – translating in the Samoan language some of the key areas for attention of staff on attendance and leave entitlements as well as procedures to follow,
2. Overseas travel policy – translating in Samoan language some of the key areas for staff attention in the preparation of travel and documents required to support such travel as well as entitlements and expectations from both the Ministry/Public Service and the staff member,
3. Local travel policy – translating in Samoan language the standard entitlements which applies equally to all staff as well as approvals required and documents and entitlements expected,
4. Overtime policy – translating in Samoan language the PSC requirement as outlined in the PSC-WCE and standard entitlements applied equally to all staff including expectations from staff for overtime. entitlements as outlined in the

The formulation of the Ministry's first Service Charter was also a milestone in reinforcing attitudinal changes and refreshing Public Service Values and its important role in providing services to the public.

SECTION 4: MCIL BUDGET APPROPRIATION 2010-2011

4.1: EXPENDITURE DETAILS:

As outlined in table Schedule 1 below, by the end of the financial year 2010-2011, the Ministry's total **approved budget remained at \$15.994 million**, an increase of 5.7% from the 2009/2010 period. As indicated by chart 1 on the left, **only 19%** of this was provided directly for the implementation of the **Ministry's outputs/activities, 67% was provided for Third Party Component** (TPC-which included provisions for the Samoa Tourism Authority –STA (\$10.2m or 96%) and rest with SBEC) and **14% for Transactions on behalf of the state (TBS)**.

In terms of delivery, the Ministry delivered 96% of the TBS component, compared to last year's delivery of only 45%. Activities remained the same under this category apart from the absence of the funding for the private sector (in response to the reconstruction efforts for small to medium

accommodation facilities affected by the Tsunami of September 2009) which featured in last year's financial report. To be documented and of significance importance is the Governments ongoing annual contributions through the Ministry's budget to the lease for Yazaki EDS of \$0.98m. Other activities which feature under this TBS category include membership to international organisations, Private sector grant (\$100,000 annually) as well as office space rental for the Ministry with ACC premises of \$0.55million. Another significant expenditure under this component was the \$107,927 payment to the NUS-IOT for the management of the Apprenticeship scheme as per the agreement signed in February 2010.

Third Party Outputs achieved 100% of delivery whilst the Ministry outputs utilised 96% of its allocation compared to 95% of the previous year. You may note from Chart 2 on the left, that of this 96% of expenditures, 69% was actually spent on personnel, 24% for operating and 7% for capital expenditures. Compared to last year, actual expenditure increased for Capital items by 4% whilst actual personnel spending were reduced by 5% for procurement of two Ministry vehicles, one double cab pickup for the CEO and one Van for the office.

4.2 COST RECOVERIES/REVENUE COLLECTION

Cost Recoveries 2010-2011

Overall the Ministry Managed to collect 87% of its projected revenues for the period 2010-2011, this is a 2% drop from the previous year's total collections. The shortfall is due to drop in the number of recoveries collected under the apprentice scheme due to the drop in the roll of enrolment. The collection reflects a 3% shortfall from the volume collected in the previous year.

SCHEDULE 1: STATEMENT OF RECEIPTS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2011				
	2011 \$	Estimate \$	Over/(Under) \$	2010
	\$	\$	\$	\$
RECEIPTS BY MINISTRY				
Commerce, Industry and Labour	260,859	301,393	(40,534)	268,627
